

# \$CPEPE

**Chef Pepe is the most memeable memecoin in existence**

# INTRODUCTION

- ✓ Chef Pepe aims to be one of the fastest growing communities in the crypto world.
- ✓ Chef Pepe is the next evolution of a reflection token on Arbitrum. 4% of every transaction is rewarded to \$CPEPE holders.
- ✓ Just hold \$CPEPE and yield \$ARB with each transaction.
- ✓ Start earning passive income automatically just by being a holder of Chef Pepe.
- ✓ Redistribution of \$ARB goes directly into your wallet.

# WHY ARBITRUM?

Arbitrum is cheap and quick to use, and relays all transaction information back to the main Ethereum blockchain. While Ethereum manages a mere 14 transactions per second, Arbitrum races ahead at 40,000 TPS. Transactions cost several dollars to complete on Ethereum, while they cost about two cents on Arbitrum.

And Arbitrum also supports the Ethereum Virtual Machine (EVM), meaning that Ethereum DeFi developers can integrate their decentralized applications (dapps) with Arbitrum without having to make any modifications.

# AIRDROP MECHANISM

- ❖ As the Chef Pepe family, our priority is to reward the members of our community and our loyal companions. That's why we will constantly reward members of our community by doing meme contests etc. We will encourage people to hold \$CPEPE by rewarding our loyal holders with the Airdrop Mechanism.
- ❖ We will take snapshots at random times, and long-time \$CPEPE holders will be rewarded with a substantial amount of \$CPEPE tokens based on the number of \$CPEPE they hold.

# CHEF PEPE NFT COLLECTION

- ❖ Chef Pepe NFT Collection will both help us grow our community and reward those who are part of our community.
- ❖ 40% of \$CPEPE supply will be airdropped to our OG NFT holders.
- ❖ Both Pepe and meme lovers will want to add CHEF Pepe NFTs to their collections.
- ❖ You will also be able to earn \$CPEPE tokens by staking Chef Pepe NFTs!

# NFT STAKING

- ❖ NFT Staking will be one of the few ways to get \$CPEPE token, which is growing day by day. In this way, both your NFTs will be valuable and your NFTs will provide you passive income every day.
- ❖ Regular burns will reduce supply and make the \$CPEPE token more valuable. That's why NFT Staking will play an important role in the \$CPEPE ecosystem.

# TOKENOMICS

## **4% Reflection Fees**

4% of every transaction is taken and redistributed to all holders.

Hold \$CPEPE tokens, earn \$ARB.

## **1% Marketing Fee**

1% of every transaction is allocated to Marketing. This allows us to fuel our most ambitious projects in service of further rewarding our community.

## **2% Liquidity Fee**

### **1% Buyback Fee**

3% of every transaction will be used automatically to provide a more stable token price.

# TOKEN DISTRIBUTION

25% **Liquidity** => Locked for 3 years

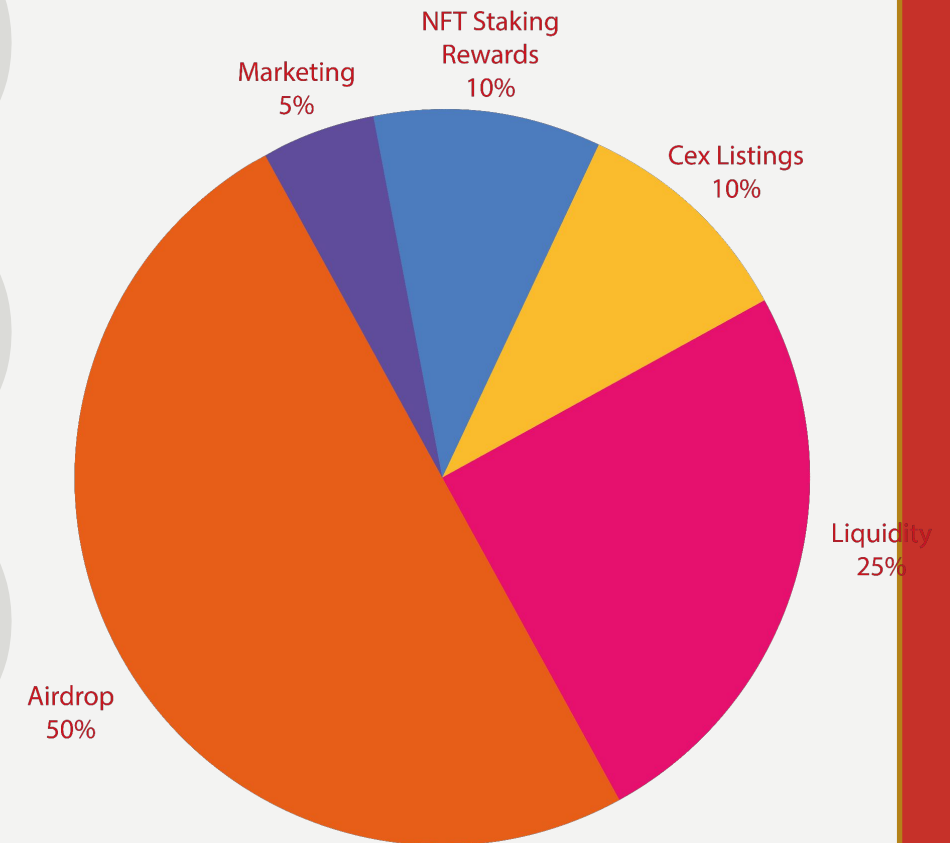

50% **Airdrop** => Unlock depends on contests and giveaways

5% **Marketing** => 10% at TGE then 9% every month

10% **NFT Staking Rewards** => Locked until NFT Staking goes live

10% **Cex Listings** => Unlock depends on Cex Listings

**Maximum Supply: 100,000,000,000,000**
